

# The NuPolar® Family of Colors

## Gray 3

Most popular sunwear color

Good for high sun and very bright situations

Does not alter colors, they remain true to their original hue

## Brown

High contrast, highlights reds and greens

Filters more blue light

Excellent visual acuity

## Copper

Cosmetically attractive tint

Good depth perception and definition in colors and objects

The preferred color for driving; highlights reds and greens

## Green

Accurately matches the color of Ray-Ban's original G-15® glass lens

Enhances colors
